

STANDARD BODYSUIT

The measurements in **chart 1** are garment measurements taken with the bodysuit lying flat and unstretched. Use this chart if you have an existing bodysuit that you can measure and compare to these measurements. Don't be surprised if your existing bodysuit is tagged with a size larger than ours. Other brands often use small sizing. Our bodysuit sizing is standard clothing sizing and the size you need should be similar to the size of your everyday clothes.

The measurements in **chart 2** are body measurements and can be used as a guide to work out your size to give a snug fit. Lycra will stretch quite a long way once on your body but it's important to take care not to choose a size that will over stretch the bodysuit, as this will put undue pressure on the stitching. If you'd prefer your bodysuit a little more relaxed rather than snug, consider the next size up. The size you choose should be fairly consistent with the size you would normally wear.

The size chart is intended as a guide only to help determine your size. Accurate sizing from the size chart depends on the accuracy of your measurements, so you might want to get a friend to help you with the tape measure. Contact us for advice if you are unsure of sizing as bodysuits are custom made to your order and cannot be returned or exchanged if you order the wrong size.
