TD-900X

HERCULES DUAL MOTOR DRYER

- The most powerful dual motor pet dryer in the world which provides amazing wind speed of over 72m/s (over 15000FPM). • HERCULES double motor dryer is built for durability and longevity, designed to literally blast water off wet coats for faster and more efficient drying.
- The breakthrough technology of the HERCULES dryer presents to you the natural heating, quiet and insulated operation. Hence improve productivity in your business.
- The powerful motor delivers a high volume of regulated warm air to blast water from coats without damaging coats due to overheating.
- A special designed solid state variable speed control device is the answer for various drying needs, air temperature is steady from 35°C - 65°C (95°F-149°F).
- Weight just approximate 13lbs makes it a portable dryer, easy and convenient to be carried and handle anywhere you need.
- Each unit is equipped with 3 meters (10ft) puncture-resistant, tripe reinforced flexible hose. A concentrator and a flare nozzle will handle all breeds and coats.
- Constructed of rugged, durable steel and built to blast, with nonskid tabs on bottom.
- Dual mounted legs, which allow both vertical and horizontal use.
- Filter is washable and easy to replace.

TD-901S

STAINLESS STEEL FORCE DRYER

- A force blower, a finishing dryer and also an air massager, the most versatile dryer in our line.
- Top grade SUS304 stainless steel promises a 10 year service life without any rust.
- This stainless-steel, variable-speed dryer detaches from the workstation stand for use as a portable or floor dryer; the air nozzle swivels 360° for accurate drying.
- Weighing just approximate 12lbs makes it a portable dryer, easy and convenient to be carried and handle anywhere you need; dual mounted legs, which allow both vertical and horizontal use.
- Total steel made workstation stand available, which guarantee reliable stability against tipping; adjustable height from 95-119cm(37.5"-47") with the ease of touching one button; The angle of the hard tube could also be tilted as your need.
- Equipped with a 3 meters puncture-resistant, triple reinforced, flexible hose, three nozzles, one silicone insulated jacket and a SUS304 hard tube.
- Filter is washable and easy to replace.

HOSED DRYERS

- The breakthrough technology brings natural heating and quiet, insulated operation to improve productivity in grooming shops.
- Powerful, high velocity dryer delivers a high volume of warm air to blast water from coats without damaging coats with heat.
- Unbreakable "Incoloy" tubular heating element.
- Two-stage filtration and solid state variable speed controls. Two speeds allow you to control the airflow to suit your drying needs.
- Weighing just approximate 5 kg makes it a portable dryer, easy and convenient to be carried and handle anywhere you need.
- The unit has a 3 meters puncture-resistant, triple reinforced, flexible hose with three nozzle options, narrow concentrator, wide concentrator and air flare, to handle all-size pets and all coats.
- Constructed of rugged, durable steel and built to last, with non-skid tabs on bottom.
- Dual mounted legs, which allow both vertical and horizontal use.
- Filter is washable and easy to replace.

TD-904S

SUPALITE HANDHELD DRYER

- Super Light weighted, only 0.8kg (28oz); No heavy burden on your wrist anymore.
- Small but mighty, providing amazing wind speed at 45m/s, one of the best score in this class.
- Brand new developed Johnson Motor with breakthrough technique brings a 14,000 hours ultra long lifespan and also quiet running.
- 3 stage heating setting and 2 stage speed control, plus genuine tourmaline crystals and ionized concentrator included, ensure a fantastic user experience.
- Advanced tourmaline negative ions seals hair from moisture and uncurl dog hair to go straight as you wish, especially for the curly breeds like poodle, etc.
- One-action cold air button, smart heating control guarantee a shining, silky and smooth finished hair.

TD-9041
GROOMER'S THIRD ARM

- Free both hands for grooming with this convenient attachment.
- Two heavy-duty spring clamps are attached to a flexible 45cm cable to create a helpful "third arm".
- Perfect for positioning handheld dryers.
- Clamps accommodate most size of dryers and feature rubber tips that won't mar tabletops or equipment.
- Gooseneck style cable can be positioned at any angle to hold dryer where you need it to help you grooming more efficiently.

ITEM	Single				Packing

Removable Wind Concentrator

Two Optional Rear Caps

TD-904S-PRO THE 2ND GENERATION TD-904S SUPALITE HANDHELD DRYER

- Patented air inlet design brings much better noise control to this fantastic dryer.
- Two rear cap options, bigger cap with noise reduction structure offers much quieter operation and small cap offers lighter hand feel.
- 14,000 hours ultra long life motor allows almost 10 years service life averagely (running 4 hours per day).

TD-906

STAND DRYER

- The maximal wind speed of exit is as high as 38m/s. • Temperature range is from 25°C to 75°C. • A heavy duty 1 HP fan air-cooled brushless motor, solid state controls, calrod heating element, and air adjustment. • Variable air and temperature control, suitable for all kinds of breeds. • Provide hands-free fluff drying. • Non-slip sturdy stand, powder coated, with long lasting locking casters;
- Balanced design provides better stability. • Dryer has a lovely orange epoxy finish. • Great technology breakthrough makes its noise much lower. • The filter is easy to clean, with washable foam. • Nozzle rotates 360°, E-Z to be positioned at any angle.

ITEM	Single			Container	
	Net Weight (kg)	Gross Weight (kg)	Dimension (cm)	20ft	40ft

TD-905

WALL-HANGING DRYER

- Variable wind and temperature control. • The maximal wind speed of exit is as high as 38m/s. • Temperature range is from 25-75 Celsius Degree. • Brushless motor, Maintenance free - no oiling or greasing of internal parts.
- Only 1800 watt, low energy cost. • Running quiet, lower than 40 db. • Fashion shape designed by Italian master.
- ABS surface of the body, resisting harsh chemicals and strikes. • Outside-inside is two layers, preventing from over-heated. • The nose is made of PPS material, resisting over 260 Celsius Degree high temperature.
- Hanging arm could be lifted and lower for approximately 13 thousand times.

TD-907

COMPARTMENT DRYER

- Automatic shut-off timer, could be set from 5-60 minutes.
- Suitable for all breeds of dogs and cats, especially the older and skittish ones.
- Running amazingly quiet, virtually vibration-free, could please even the most sensitive animals.
- High wind pressure, blast water from under coat.
- Solid state control to switch wind and temperature;
- The breakthrough technology of PTC control, keep the temperature safe, steady from 35°C to 50°C.
- Two powerful motors, ultra high volume of 2,700 cubic feet of air per minute----enough to dry up a golden retriever in about 25 minutes.
- Efficient and reasonable air exchange model, make sure the humidity low all the time and enough fresh air for dog.
- Entire stainless steel faceplate and grill, easy to clean and sterilize, last for long time.
- Ozone function, remove the odor away and refresh the air inside; (Attention: Must not use ozone when have dog inside)
- Foolproof operation, hands free from put-in to take-out.
- Dimensions: 126×66×107.5cm(h); inner size 81×65×69cm(h)

TD-908

NOISE TERMINATOR -- CENTRAL DRYER SYSTEM

THE TERMINATOR OF THE DISEASES CAUSED BY NOISE

If you are a groomer, have you suffered enough of the endless noise from dryers in your working environment?

If you are a pet shop owner, have you ever heard the complaints from your groomers about the irritable noise?

If you are a salesman of professional equipment for pet shops, have you seen the scowl on your potential customer's face for the avoidless noise?

If you are a boss of the equipment distributing company, have you gotten any suggestion or requests about the quiet running dryer?

If you are a doctor, have you ever received any patient who's bearing the pain from high blood pressure, heart disease or tinnitus, caused by noise?

One-Button-Start
Manual Switch on Nozzle

10m Ultra Long
Flexible Hose

Everybody knows noise is not good for people's health, since it may trigger many potential diseases, but what diseases will actually be caused by noise? Here are some researching results from different channels; maybe we can take these as some reference.

Cardiovascular Disease

"In accordance with the noise stress hypothesis chronic stress hormone dysregulations as well as increases of established endogenous risk factors of ischaemic heart diseases have been observed under long-term environmental noise exposure. Therefore, an increased risk of myocardial infarction is to be expected."

"According to the Environmental Expert Council, these studies show a consistent trend towards an increased cardiovascular risk if the daytime immission level exceeds 65 dB(A)."

Source: Noise and Health, Volume 6, Number 22, Jan - Mar 2004, pp. 5-13(9), from Environmental Expert Council of Germany.

High Blood Pressure

"What we found - somewhat unexpectedly - was that the people most exposed to aircraft noise had high blood pressure, says Goran Pershagen, a professor in environmental medical epidemiology at the Institute of Environmental Medicine, Karolinska Institute and continues:

"Even though this is a completely new finding, we have been able to confirm that people who are exposed to loud aircraft noise run the risk of developing high blood pressure. We must do more research about these serious effects to see at what levels they occur."

Source: Gunnell Bergstrom from Stress Research Institute at Stockholm

Heart Disease

"For the new study, researchers examined a database of more than 6,000 employees ages 20 and older who were surveyed about lifestyle, occupation and health. The participants were grouped according to those who endured loud noise at work (meaning it was difficult to talk at a normal volume) for at least three months and those who did not experience loud noise. The study found 21% of workers, mostly men, endured noisy workplaces. They were two to three times more likely to have heart disease compared with workers who did not experience noise."

Source: Shari Roan from Los Angeles Times

Tinnitus

"Causes of ear tinnitus can be defined as follow: Exposure to very loud noise. Internal structure of human ear is very complex and sensitive. Those hearing cords get affected by very harsh, loud noise. The vibrations of the deafening sound hurt the internal structure of ear which causes this disease. Machine operators, factory workers, welders develop ear tinnitus in their mid-forties."

Source: John Robus Mathew from <http://www.earintinnitus.com>

Therefore, we could know noise is the direct cause which triggers many occupational diseases. To avoid these above potential diseases and protect groomer's health; we have spent years of time on researching the noise reduction technology on pet dryers.

Finally, a great breakthrough has been made to realize our dreaming aim.

We name it after Noise Terminator, which is a combination of many advanced technologies, including the Noise Conduction Control in Solid, Noise Absorption, Noise Transmitting in Air, etc. After this epoch-making technology was used on our Central Dryer System, the noise has been reduced to an amazing level at about 65dB, which is a fabulous achievement in the field of pet dryers.

The system can play the role of two powerful dual motor dryers, so that you could blow two dogs at the same time. If necessary, that's even possible to make it more powerful to have four dryers inside with four individual wind outlets.

Two 10m long flexible hoses going along an extendable bar will induce the 72m/s high speed wind from the working center to the top of grooming table. The hoses can be mounted to the ceiling of the room, then the hoses could be protected better and avoid the unnecessary damages. A smart designed spring balancer, with the vertical part of the hose attach to, will lead the hose from ceiling to your working location; when you need to use the dryer, just pull the nozzle down gently, then put it back easily when all the works finished. The most amazing part is, you are able to control the dryer conveniently by pressing the button on the hand holding part, the round nozzle. That's not necessary for you to walk to the working unit to switch it on or off during your busy time, One-Button-Start system brings a much pleasant customer experience to you. You can place the working unit in grooming room, which looks like a cabinet, or put it out of the room to cut the noise 100% off.

Ergonomic, people friendly and easy to use design brings you extraordinary experience on this brand new dryer system, and also brings much healthier and more pleasant working environment.

After all, no matter how much money you earn, health is still priceless, right?

FT-811/812/813

FOLDING GROOMING TABLE WITH S/S LEG

- Non-slip pure rubber matting, pyramidal pattern, scraping resistant and easy to clean.
- Striking desktop, reduce the visual fatigue during long hours working. • Static-free board, easy to clean the eliminate hair and debris. • Waterproof 7-Layer plywood top. • Elastic PVC edging, resists scratches and hauls. • Stainless steel tubular steel leg. • Featured design support brackets, available for heavy weight. • 32mm diameter strong leg and steel reinforced rubber caps make the table ultra high stabilization. • Folds easily for storage.

SPACE SAVING FOLDING TABLE

- Without moving any objects from the shelf, a simple pull on the wall mounting clip lowers the table to the suitable position and the shelf becomes the foot of the table.
- The center of gravity of the shelf remains perpendicular to ground when moving the table top, since the shaft turns really smoothly.
- A perfect solution for the space sensitive grooming shops, especially the small or mini shops, balances the off season and rush season; you can enlarge your working area and add more platforms in 5 seconds in the rush season and also fold it up to leave more space in off season.
- 100cm×60cm table top with 80cm height when leg fold down.
- 15cm wide shelf board offers great stability when table standing, and also play the role of a tools shelf when table top folded up.
- A special designed stopper ensures the leg won't be knocked down however you kick unconsciously to avoid any potential risk caused by table top falling-off.

Why we need the space saving tables?

To arrange the working area properly is a real challenge for every owner of pet shops, because they always feel there are too few grooming tables when needed in busy season, such as the peak time before every Christmas; and no place to stock the extra tables when not needed at ordinary times. The new launched Space Saving Grooming Table series is the best answer to the above problem, which could balance the rush and off season perfectly. One or two quickly added grooming tables will be a great helper when you need them in a hurry, then the shelf and storage cabinet are still very practical furniture for your grooming room when the table's not needed.

FT-806

SUPER STABLE

ELECTRIC LIFTING TABLE

➤ • The best feature of this table is **S-T-A-B-L-E**. • Four vertical bars holding the table top even lifted to maximum and the center of gravity is still in the middle. • Unbelievable stability against wobbling or tipping, realize the safest electric lifting table in the market. • The minimum height is 36cm (14") when lifted down to bottom, provides much smaller packing size and much lower start point height. • The outer packing size is only 128cmx67cmx38cm (50" x26" x15"), which means the container load will increased by 24%.We could even load 7 layers of this table into a 40'HQ. The height could be adjusted from 36cm to 104cm (14" to 40"), satisfy most daily grooming purpose.

ITEM	Net Weight (kg)	Gross Weight (kg)	Dimension(cm)		Volume (cbm)	Container(pcs)	
			Stand	Package		20ft	40ft
FT-806	50	53.3	126×65×36-104	128×67×38	0.330	71	145

- • Rising Velocity: 13mm/s (off-load) / 11.5mm/s (63kg loading)
- • Descent Velocity: 14.5mm/s (off-load) / 15mm/s (63kg loading)
- Voltage: 110V-120V / 220V-240V • Control Unit: Two Pedal Plates (manual switch available)

• Highlight:

1. More Stable Structure.

Four vertical bars holding the table top even lifted to maximum and the center of gravity is still in the middle.

2. Much Smaller Packing Size.

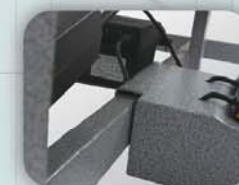

As the table could be lifted down to 36cm (including the adjustable levels), so the outer packing size is only 128cm×67cm×38cm, which means the container load will increased by 24%. We could even load 7 layers of this table into a 40'HQ.

3. Bigger Regulation Range.

The height could be adjusted from 36cm to 104cm, which will satisfy most daily grooming purpose.

Difunctional Foot Pedal with Flexible Cable

FT-807

FIBERGLASS BUGGY LIFTING TABLE

- Two bright colors to choose, pink and yellow, with featured paws' patterns ornament on the surface to keep skid-proof.
- Patented lifting caster structure, allows the table to keep definitely stable when casters lifted up and outstanding mobility when down to ground.
- Foolproof manual buttons to control lifting up and down; the height can be adjusted from the 54-100cm (21"-40"), to ensure easy step-up access for pet and also right ergonomic height for groomer.
- Practical storage portion design, allows groomers to place brush, spray, blade and scissor easily and conveniently.
- Warm touch feeling surface, provides very special feature as a crash cart; you could put the injured pets onto this buggy from ambulance or owner's car then transport to operation room directly.
- Super long lasting life of the fiberglass material, offers a 50 years use life for this tabletop.
- The loading capacity is 200kg (400lbs), strong enough to hold any breeds; with both single grooming arm and over-head arm available to fix dogs firmly.
- The most functional, convertible and versatile table in our table line.
- Size: 115cm×60cm×54-100cm(45"×23.5"×21"-40")

ALUMINUM MODULAR CAGES

KA-507 SERIES

► Obviously stainless steel is an ideal choice for vet cage or salon show cage, but the unsteady price of S/S material has become nightmare of many factories. • Aluminum could play the role of the best substitute of stainless steel, from the rustproof feature, strength, durability and comparatively acceptable price. • At the same time, aluminum has some better features than stainless steel, for example light-weight, easy to process with, etc. • Our brand new aluminum modular cage system is the perfect solver, with uniquely convenient assembling methods. • Every cage, no matter large or small size, could be folded into an 8cm (3") panel, including the space of waste tray and standing grid, which will save much more packing size. • At the same time, you only need to spend 15 seconds to set up one cage, which should be the best record in the assembly cages, saving a lot of time and labor cost for us. • By the way, the mobility is enhanced by handles and casters. • If we fix a set of wheels and handles to the cage, it will be able to be transformed into a trolley easily. • A wonderful option for pet shop owners.

STAINLESS STEEL HYDRO BATH

> SUS304 top class stainless steel brings the top durability to this hydro-bath, strong and anti-scratching. Skidproof aluminum standing board prevents the potential injury caused by dog sliding. Double filters in water tank, at both water inlet and outlet position, ensure the pump will not be blocked by any hair or dirt. The recirculating water system could save a lot of cost on wasted shampoo and conditioner, since the soapy water still works well after recirculating for times, and also increase the working efficiency significantly. Triple water outlets decide which way the water is coming back and when to release all the waste water out. Two individual pumps and two single circuit controls increase the reliability of the bath a lot, so you can control one recirculating line as you wish. Two side doors allows dogs going in and out of the bath easily. The special designed self-priming pump produces a high volume mix of water and shampoo delivered powerfully enough to penetrate the thickest of coats. The unique Hydro-combing action of the spray head gently massages and stimulates the skin. This is a very effective way of washing your dog but also provides a therapeutic water massage that helps with blood circulation and relief of tired muscles. Other benefits include removal of dead skin cells, embedded flea eggs and any other materials that can be hidden and under normal circumstances prove very difficult to remove. This promotes healthier coats and improved skin conditions.

Double Side Doors
