

This file contains both the current Filter Catalogue and a Supplementary Application Listing of recently added Filters and Applications.

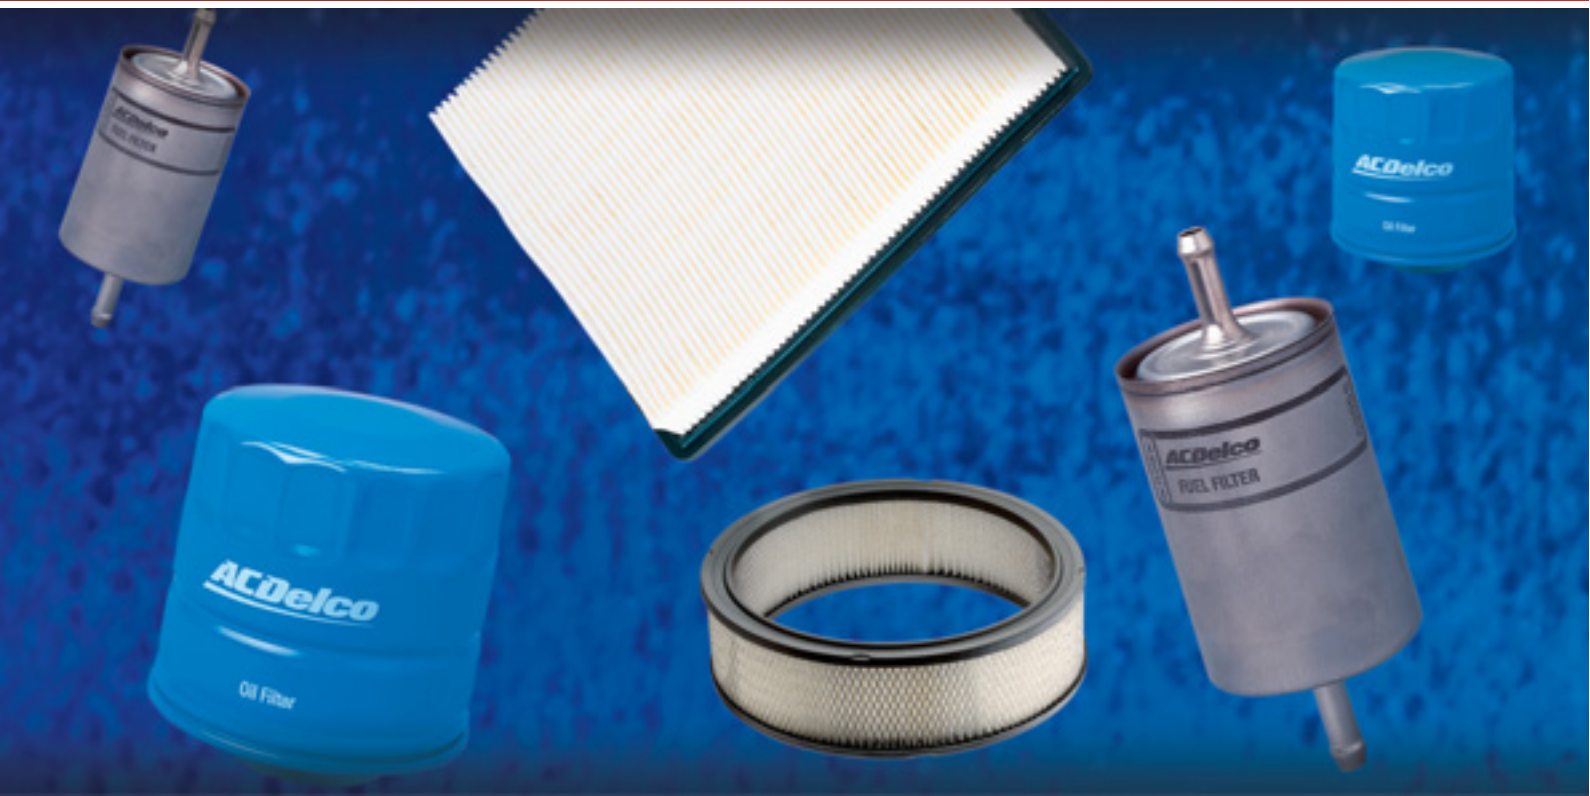

This 4 page Supplementary Application Listing is intended to be used in conjunction with the existing ACDelco Oil, Air and Fuel Filter Catalogue (*Issue 7*).

Cabin Filter applications are currently provided in a separate up to date listing within the website.

REAL CAR GUYS KNOW

ACDelco[®]
Automotive Parts

The ACDelco Story

ACDelco is a premium line of automotive parts sold throughout the world for practically any type of vehicle anywhere in the world...with 70,000 high quality parts covering over 30 product lines to fit most major auto manufacturers.

The extraordinary expertise in automotive technology gives ACDelco a distinct advantage over other suppliers.

Our resources enable ACDelco products to meet or exceed the most stringent original performance standards. When it comes to offering dependable replacement parts for a wide variety of product line and applications, our coverage spans the world.

With our 85-year tradition as an industry leader, ACDelco has acquired the resources, technical advancements and manufacturing processes to outperform the competition anywhere in the world.

ACDelco's resources and capabilities put us on the leading edge of automotive replacement part technology. Consumers and installers can be sure of getting parts to fit today's sophisticated automotive systems - with an emphasis on dependability, availability and quality.

All information contained in this catalogue is based on authoritative information available at the time of publication. However, while every precaution has been taken in the compilation of this information, we cannot accept responsibility for inaccuracies in print or specifications.

ACDelco[®]

About ACDelco Oil Filters

Background

ACDelco Oil Filters are used to prevent harmful contaminants from entering the engine, and contribute to consistent oil flow management.

ACDelco products meet or exceed all application requirements and provide a mix of filtration performance, flow management (hot, cold, and with water present) and product durability.

Features and Benefits

ACDelco adheres to high quality control standards in the production of ACDelco Oil Filters.

Raw materials used are thoroughly tested to ensure compliance to specifications and filters are tested to meet customer expectations for fit, form and function.

The advanced design of ACDelco Oil Filters helps prevent harmful contaminants from entering the engine by filtering out microscopic particles.

Duraguard Advantage

The advanced ACDelco Oil filter design helps trap harmful microscopic contaminants. The cellulose and synthetic fibers, used in Duraguard Oil Filters, can trap contaminants as small as 25 microns (one-third the width of a human hair).

The filter media determines efficiency, performance and useful life of an oil filter. Duraguard Filters are designed to have high efficiency capabilities throughout the entire life of the filter. Other filters may only provide high efficiency at the latter part of the filter life.

Manufacturing Process

The oil filter assembly process provides a high quality, synchronous manufacturing system.

The filter shell fabrication utilizes the latest in metal drawing technology. In-process monitoring is used to 100 percent leak test continuously recording data to meet QS-9000 requirements.

Product Testing

Using advanced testing technology, ACDelco uses independent laboratories to conduct stringent tests to demonstrate the overall superiority of ACDelco Oil Filters.

ACDelco[®]

About ACDelco Air Filters

Background

ACDelco Panel and Round Air Filters trap microscopic particles that can damage the engine, cylinder walls, pistons and piston rings.

ACDelco Air Filters have been designed and developed with the original equipment and application needs considered.

ACDelco products meet or exceed the application requirements with soft, pliable seals for leak-free installations, excellent high-temperature integrity and engine vibration and temperature durability.

Features and benefits

ACDelco Air Filters employ, resin impregnated media and optimal pleat counts to increase their contaminant holding capacity.

ACDelco adheres to quality control standards in the production of ACDelco Air Filters.

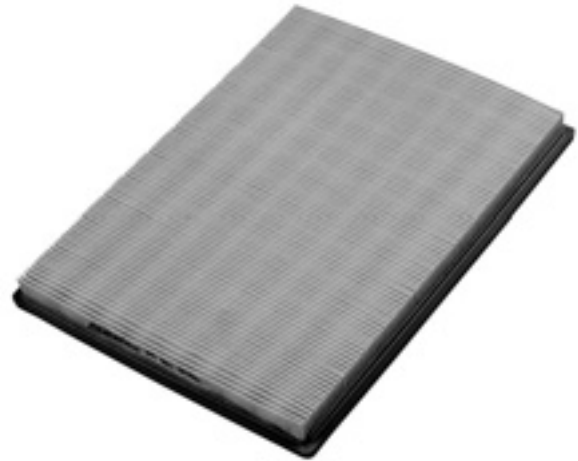

Raw materials used are tested to ensure compliance to specifications and filters are tested to meet customer expectations for fit, form and function.

Panel Air Filter

- Urethane gasket low effort installation provides maximum seal.
- Linear airflow direction allows only clean air to enter engine.
- Bonded folds prevent dust from entering the engine.

Round Air Filters

- Plastisol end seals prevent dirt from entering combustion chamber.
- Paper overlaps or metal clips keep dirt and dust in filter.

- Inner screen provides backfire protection for media.
- Resin impregnated media provide greater dust and dirt holding capacity.

Manufacturing Process

Process monitoring is performed during manufacturing to ensure that each filter maintains ACDelco quality.

Competitive Review

Our engineers frequently benchmark against the competition.

Specifically we test the following:

- Filtration efficiency
- Capacity
- Restriction
- Sealability
- Durability

ACDelco[®]

About ACDelco Fuel Filters

Background

Fuel filters are used to protect the vehicle fuel system from dirt, rust, scales and water contaminants that can plug or wear out carburetors and fuel injectors and cause poor vehicle performance and engine failure.

ACDelco Fuel Filters assist in preventing engine contamination and help provide a long, trouble-free engine life. They are available for in-line carburetor and fuel-injection applications.

ACDelco Fuel filters have been designed and developed with the original equipment and application needs considered.

ACDelco products meet or exceed all application requirements and assist in providing the correct overall mix of filtration performance, materials compatibility, flow management and durability.

Features and Benefits

ACDelco adheres to high quality control standards in the production of ACDelco Fuel Filters.

Raw materials used are thoroughly tested to ensure compliance to specifications, and filters are tested to meet customer expectations for fit, form and function.

In-Line Fuel Filter

- Direct installation into the fuel line adds greater versatility when used with other fuel system protectors.
- Resin impregnated pleated paper filtering media increase filter capacity.
- Threaded and tube type fittings allow easy installation in metal or rubber fuel lines.

Fuel-Injector Filter

- Meets filtering requirements of throttle-body port, central port and other fuel-injection systems.

- Seams are laser welded to withstand high pressure of fuel injected systems.
- Filter media are pleated and phenolic impregnated to increase filter capacity, efficiency and rigidity.
- Inner end plates are made of specially coated metal that is chemically resistant to all fuels currently available.
- Available in a full line of stainless steel and plastic filter products.
- Fittings are available in a variety of styles, including O-ring, tube and new quick connect fittings that provide easy installation with less labour and tooling.

Manufacturing Process

Newer fuel injection filters utilise the high speed folding heads and latest laser welding technology for the final assembly.

In-process monitoring is used to ensure pleat sealing.
