LED Technologies are excited about their new boat trailer fit out kits. Designed especially for boat trailers up to 8 metres in length, these kits contain all the lights, reflectors and cables required. They are perfect for the "do it yourself" person, there are 4 kits available with two types of trailer plugs and two popular LED rear lamps which are used by several major trailer manufacturers across Australia. The whole system is completely water proof from lamp to trailer plug featuring LED Technologies innovative DIY plug in cable system, no more time consuming splicing or joining of wires. Presented in a solid hang and stand blister pack with handy carry handle and an eye catching retail appeal also makes an excellent choice for resellers. Available now from LED Technologies.

**Four types available with everything in one complete kit - Rear and licence lamps, marker lamps cables and reflectors...**
