

Artwork Guidelines:

We accept most file formats, but for best results the preferred format is an .eps or .ai (these are the originally created artworks). If you do not have any of these formats, please send anything you have (.pdf, .jpeg) in as larger size as possible. File size/resolution is important as enlarging small files will distort the image and will reduce the quality of the print.

High quality logo – Image retains original clarity when enlarged

Low quality logo – Image becomes blurred and pixelated when enlarged

If the only file you have is a low quality one, our Logos Team will contact you to discuss your options.

*****There may be a surcharge for creating or modifying your artwork to enable us to create a high quality print*****

You may need to supply specific fonts to match your company identity.
