WHO IS CONTROL INSTRUMENTS AUTOMOTIVE?

Control Instruments Automotive (Pty) Ltd, a subsidiary of the JSE listed Control Instruments Group Limited, manufactures and distributes premium quality branded products to the automotive aftermarket in sub-Saharan Africa.

Control Instruments Automotive sells premium branded products to the automotive aftermarket in sub-Saharan Africa. It has been supplying products to the automotive aftermarket since it was formed in 1948.

The company has a significant basket of products. Brand names owned and/or exclusively distributed by Control Instruments Automotive include Gabriel, VDO, Echlin, Autocom, Acsa-Mag, Mag Brakes, Shurlok, Warn, Hi-Lift, Eurocable, ContiTech and Truck-Lite.

Control Instruments Automotive is a wholly owned subsidiary of Control Instruments Group Limited.

WHO IS CONTROL INSTRUMENTS GROUP LTD?

Control Instruments Group Limited is a holding company, based in South Africa. The Group has been listed on the JSE Limited (JSE) since 1987, trading under the share code "CNL", in the electronic and electrical equipment sector.

Mission Statement

Control Instruments Automotives mission is to be the supplier of choice of specialised products and services into selected niche segments of the worldwide automotive market.

Nature Of Business

Control Instruments Automotive is an international group that provides products, services and components to the global automotive industry.

Gabriel

OVERVIEW - SHOCKS, STRUTS & CARTRIDGES

Control Instruments Automotive designs, engineers and manufactures Gabriel shock absorbers for both the South African and International markets.

Gabriel's state-of-the-art manufacturing facility (based in Retreat, Cape Town) houses its own product development, engineering and manufacturing divisions whereby product is designed, produced and distributed to the highest quality standards.

All genuine Gabriel products are fully tested by qualified engineers and their comprehensive range of shock absorbers are specifically designed and engineered to suit local South African conditions.

The Gabriel range includes:

- Gas and hydraulic shock absorbers
- MacPherson struts and cartridges
- Steering dampers
- Gaslifts® (gas springs)
- Accessories

The Gabriel product range is supplied through its wide distribution network under the following well known brands:

Gabriel® GasRyder™, Gabriel® Safari™, Gabriel® Safari HDP™, Gabriel® Technomatic™, Gabriel® Fleet Ryder®, Gabriel® Gaslift®.

Drivers who use Gabriel shock absorbers comment on the smooth ride of their vehicles, however shock absorbers are not just for comfort; as their primary purpose is to keep wheels in contact with the road surface. Shock absorbers also affect the steering, handling and braking of your vehicle, which is why they are vital for your safety.

Our years of research and testing have resulted in Gabriel developing shock absorbers that are firm enough to prevent the wheels from leaving the road surface, but also flexible enough in their damping to ensure that the occupants are not directly subjected to the vehicle forces.

Gabriel shock absorbers limit the bounce of the wheels by controlling the rate at which the suspension springs compress and extend. In so doing, the shock absorbers help maintain traction and control of the body, as well as the pitch and roll of the car during cornering, braking and acceleration. With more accurate control and steering,

Gabriel shock absorbers enhance safety through good road holding.

Product Range - Shocks, Struts & Cartridges

Gabriel® Gas Ryder™

The Gabriel® Gas Ryder™ Series offers an extensive range of South African shock absorbers, spring seat shock absorbers, MacPherson struts and MacPherson cartridges for passenger cars, sports cars, Station wagons, small LCVs, MPVs and SUVs. With the unique nitrogen gas-pressurised dynamic response design, Gabriel® Gas Ryder™ gives both an exceptional ride as well as quicker response time compared to ordinary shock absorbers – the ultimate in both comfort and safety.

Allowing for greater ride control and performance, comfort and ultimately safety, the Gabriel® Gas Ryder™ and its Gabriel® warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

Gabriel® Gas Ryder™ Strut

Gabriel® Gas Ryder™ Spring Seat

Gabriel® Gas Ryder™ Shock

Gabriel® Gas Ryder™ Cartridge

Product Features
Ø27, Ø30, Ø32, Ø36 or Ø46 Bore working cylinders
High temperature oil that can operate up to 120°C
Nitrogen gas infused
Multi lip rod seals
NBR or Viton rod seals
Chrome plated & trication of zinc phosphate shaft
PTFE band or rubber o-ring piston seals
Sintered metal rod guides
Metal or plastic bump stop support
Natural rubber or polyurethane mounting bushes
Gabriel® 3 year warranty

Product Benefits
Oil and nitrogen gas infused for quicker response times, greater vehicle control and ultimate ride comfort
Specifically designed to give the driver a firmer and more responsive driving experience
Quieter in operation than other conventional shock absorbers
Meets the demanding requirements of today's differing suspension configurations
The high temperature oil allows for less chance of foaming
Rust inhibiting finish applied to shaft (chrome plated & trication of zinc phosphate)
Specific design features that allow for a greater resistance to fade
Manufactured locally to the highest quality standards using premium quality components

Product Range - Shocks, Struts & Cartridges

Gabriel® Technomatic™

The Gabriel® Technomatic™ Series offers an extensive range of robust and genuine South African shock absorbers, spring seat shock absorbers, MacPherson struts and MacPherson cartridges for today's passenger cars, Station wagons, MPV and LCV applications for use on both tar and gravel road surfaces.

Providing a firm yet comfortable ride with a fast response time, the Gabriel® Technomatic™ Series and its Gabriel warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

Gabriel® Technomatic™ Strut Cartridge

Gabriel® Technomatic™ Strut

Gabriel® Technomatic™ Spring Seat

Gabriel® Technomatic™ Shock

Product Features
Ø27 and Ø32 Bore working cylinder
High temperature oil that can operate up to 120°C
Hydraulic and low pressure gas units
Multi lip rod seals
NBR rod and PTFE piston seals
Sintered metal rod guides
Strike plate bump stop support
Gabriel® 3 year warranty

Product Benefits
Oil and nitrogen gas infused for quicker response times, greater vehicle control and ultimate ride comfort*
Specifically designed to give the driver a firmer and more responsive driving experience both on tar and gravel road surfaces
The high temperature oil to prevent foaming
Multi lip rod seals for better sealing thereby increasing shock absorber life
PTFE piston band for reduced friction and wear thereby also increasing shock absorber life
Rust inhibiting finish applied to shaft (chrome plated & trication of zinc phosphate)
Manufactured locally to the highest quality standards using premium quality components

* On selected part numbers only

Product Range - Shocks, Struts & Cartridges

Gabriel® Safari™

The Gabriel® Safari™ Series offers an extensive range of genuine, robust, large bore South African oil and gas shock absorbers catering for the demanding requirements of today's light commercial, heavy car, Station wagon, SUV and MPV applications both on and off-road.

Allowing for greater ride control, comfort and ultimately safety, the Gabriel® Safari™ Series and its Gabriel warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

Gabriel® Safari™ Spring Seat Shock

Gabriel® Safari™ Gas Shock

Product Features
Ø32 or Ø46 Large bore working cylinder
High temperature oil that can operate up to 120°C
Low pressure nitrogen gas infused
Single or multi lip rod seals
NBR and Viton rod seals
Chrome plated & trication of zinc phosphate shaft
Teflon piston band or cast iron piston ring
Sintered metal rod guides with Teflon DU bushes
Metal dust covers or PVC gaiter protectors
Natural rubber or polyurethane mounting bushes
Gabriel® 3 year warranty
Note:
5500 Series: Is a heavy-duty hydraulic big bore size shock absorber designed for light trucks, MCVs, SUVs and heavy cars.
5600 Series: Is a heavy-duty nitrogen infused big bore size shock absorber designed for premium performance applications on today's MCVs, LCVs and SUVs.

Product Benefits
The large big bore working cylinder will reduce the stress on the working components of the shock absorber thereby increasing the durability of the shock
Oil and nitrogen gas infused for quicker response times, greater vehicle control and ultimate ride comfort*
Specifically designed to give the driver a firmer and more responsive driving experience both on and off-road
The high temperature oil to prevent foaming
Polyurethane/rubber mounting bushes considerably reduce wear and tear**
Rust inhibiting finish applied to shaft (chrome plated & trication of zinc phosphate)
Manufactured locally to the highest quality standards using premium quality components

*5600 Series only ** On selected part numbers only

Product Range - Shocks, Struts & Cartridges

Gabriel® Safari HDP™

The Gabriel® Safari HDP™ is a genuine, robust, technologically advanced, big bore shock absorber specifically designed and manufactured in South Africa to cater for the heavy-duty performance requirements of today's SUV, 4x4 and light commercial applications.

Allowing for greater ride control and increased comfort over other comparative shock absorbers in the market, the Gabriel® Safari HDP™ and its 3 year unlimited kilometer warranty delivers up to its historical Gabriel pedigree and also sets a new standard for performance based shock absorber applications.

Gabriel® Safari HDP™ Shock

Gabriel® Safari HDP™ Spring Seat Shock

Product Benefits
Ø35, Ø41 or Ø46 Extra large big bore working cylinder
High temperature oil that can operate effectively at 180°C
Viton rod seal
Hydraulic stop lock
360° Reinforce welded mounts
Solid machined eye rings
Durable polyurethane/rubber mounting bushes
Teflon DU bushes in rod guides
Velocity sensitive valving
Gabriel® 3 year unlimited kilometer warranty
Colouring Features
New "eye catching" green product housing/body
Black dust cover
Black mounting bushes
New look packaging with quick side reference HDP colour coding

Product Benefits
The extra large big bore working cylinder will reduce the stress on the working components of the shock absorber thereby increasing the durability of the shock
The high temperature oil infused with nitrogen gas allows the shock to effectively operate at higher temperatures (180°C) as encountered in severe off-road and loading conditions
Normal oil operates effectively at 120°C
Infusing nitrogen gas enhances quicker shock absorber response times, greater vehicle control and ride comfort
The new polyurethane/rubber mounting bushes considerably reduce wear and tear
The Teflon insert between the rod guide and the rod significantly reduces the friction between the rod and the rod guide
The new hydraulic stop lock cushions any metal to metal contact inside the shock under full extension
The new cast iron piston ring is much more durable in high operating temperatures than the alternative Teflon type rings
The full 360° reinforce welded mounts adds significant strength to the mounting points of the shock absorber
One piece, solid machined eye rings are much stronger and aesthetically more appealing than the normal alternative curled eye rings
Rust inhibiting finish applied (chrome plated & trication of zinc phosphate)
Designed for both standard and up to 2" or 50mm raised suspensions

Product Range - Shocks, Struts & Cartridges

Gabriel® Fleet Ryder®

The Gabriel® Fleet Ryder® Series offers an extensive range of robust and genuine extra large bore, South African shock absorbers designed to meet the pressing requirement of today's heavy commercial vehicle applications.

Providing a firm yet comfortable ride with a fast response time the Gabriel® Fleet Ryder® Series and its Gabriel® warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

Gabriel® Fleet Ryder® Shock

PRODUCT RANGE - SHOCKS, STRUTS & CARTRIDGES

12

Product Features
Ø41 and Ø52 Extra large bore working cylinder
Designed for standard and air suspensions
Single or multi lip rod seals
Viton or rubber rod seals
Cast iron piston ring
Sintered metal rod guides
Metal dust covers
Natural mounting bushes
Gabriel® 12 month warranty

Product Features
The extra large big bore working cylinder will reduce the stress on the working components of the shock absorber thereby increasing the durability of the shock
Specifically designed for both normal and air suspension systems
Designed to be a replacement for most shock absorbers working in conjunction with air suspension systems
High temperature oil or extra high temperature oil depending on the application
Cast iron piston ring to improve durability
Metal dust covers to protect the shock absorber from the damage due to stones and rocks typically associated with commercial applications
Rust inhibiting finish applied to shaft (chrome plated & trication of zinc phosphate)
Manufactured locally to the highest quality standards using premium quality components

VEHICLE LISTING - SHOCKS, STRUTS & CARTRIDGES

The Vehicle listing section is an easy to use vehicle reference to all Gabriel part numbers, product ranges and technical information according to the specific vehicle make, model, derivative and year. This includes all passenger cars, MPVs, SUVs, 4x4s, Pick-ups, Trucks and Busses.

The product ranges that are highlighted in this section includes the Gabriel Gas Ryder™, Safari™, Safari HDP™, Technomatic™, Fleet Ryder® and Heavy Duty Shocks, Struts and Cartridges.

Where a vehicle is referenced to more than one part number, please refer to the section at the beginning of the catalogue (beginning on page 8) where we define the main features, benefits, placement and warranty of each range offered. At the end of the Vehicle Listing section are the current 2011 and future 2012 new Gabriel part numbers listed in alphabetical order against the vehicle application and derivatives. Further and at the end of each new reference is a column that allows for a newly released part number to be recorded when products are made available during 2012.

PARTS LISTING - SHOCKS, STRUTS & CARTRIDGES

The Parts Listing highlights our products in alpha numerical order according to their part number. This allows for easy reference to the applicable make and model of the vehicles when finding an application or applications which use that Gabriel part number.

Part numbers that are obsolete or are being phased out are indicated in italics and where available, a superseding part number is listed.

The product ranges which the part numbers are in are indicated. For product dimensions and end-mountings refer to the technical section.

Some Gabriel Europe imports are stamped with a manufacturing number and are not listed in this section and these will be found in our parts finder section.

NOTES

PARTS FINDER - SHOCKS, STRUTS & CARTRIDGES

The Parts Finder is designed to simplify a selection of an alternative manufacturers part by listing other part numbers in alpha numeric sequence and not by manufacturer.

Where a manufacturer's part number has various Gabriel part numbers that may be used, these are listed as 2nd or 3rd alternatives.

The Gabriel Europe manufacturing numbers are also listed with the part numbers given as alternatives.

Please note that any reference to brands, trademarks or manufacturers part numbers is for reference and identification purposes only.

Technical Information

How to measure extended and collapsed lengths

Notes

TECHNICAL INFORMATION - SHOCKS, STRUTS & CARTRIDGES

This section gives you detailed technical information on our shocks, struts and cartridges. This includes a technical guide to drawings whereby the general type of shock, strut or cartridge with its end mountings is listed and is referenced back to, and from, the vehicle listing and the parts listing.

A Fitment Guide which provides additional fitment information to that included in the boxes of our products. The guide numbers cross reference back from the Vehicle Listing and the Parts Listing.

The section on extended and collapsed lengths gives you the dimensions of the products as well as the end mountings and accessory packs, if any that come with the product. The extended and collapsed lengths and also a generic guide on how to remove, dispose and fit shocks/struts.

A generic guide to the fitment, removal and disposal of shocks is included at the back of the technical section. Please note that as this is a generic guide, not all vehicles will have the illustrated configuration.

Fitment Guide Definitions

Note	Fitment Guide	Note	Fitment Guide
1	Fit 2.5mm spacer either side lower sleeve front mounting	18	Use retainer 414363 (M48 x 1, 5) when replacing Bilstein O.E. front units. Use existing upper rear mounting
2	For rear use bush 414075 for lower mounting	19	Use sleeve 414167 lower for rear mounting
3	For rear use sleeve 41464 and bush 414081 – top and bottom	20	Use sleeve 414167 upper and lower for rear
4	Imported beetle front use 19289, remove bar pin, fit 404702 + 414167	21	When replacing struts with welded brake brackets use 414480 & 414481 brackets for rear
5	Remove lower sleeve	22	With rear lower eye mounting
6	Remove top front shock bushing - fit 404702 plus 414167 remove sleeve lower mount	23	With rear lower mounting bracket
7	Re-use rear lower mounting bushes	24	Only fits applications with one pin at the bottom strut mounting
8	Re-use rear lower mounting bushes Using G45874 or 61242 upside down does not work	25	Re-use spring seat, upper mounting and bump rubber for rear shock
9	Re-use spring seat, upper mounting and bump rubber for rear shock	26	76042 for models with 25mm rubber bushes upper and lower. 76017 for models with 20mm sleeves upper and lower
10	Use 414371 retainer (M48 x 1.0) for front	27	77022 with Neway ARD 125/244 air suspension 77018 with Hendrickson TA 460 air suspension
11	Use existing rear mounting	28	O.E 16-13947-000 or 6813260400 for 85319 and O.E 16-13957-000 or 680339 for 85724
12	Use existing upper front mounting	29	Some use G56102 with 16mm eyes
13	Use existing upper rear assembly	30	Use 20mm spacer on lower mounting
14	Use existing upper rear mounting	31	Use 4 x 401754 rubber bushes
15	Use kit 140729 for rear	32	Use rubber bush 414323 x 2 for front and rear
16	Use kit 144028 x 2 for front and rear mountings	33	Refer to fitment instructions located inside the box
17	Use retainer 414334 with RS2000		

Note: Standard fitment instructions are also included inside all product packaging

How to Protect your Struts - Gabriel Strut Cushion

Control Instruments Automotive wants to emphasize the importance of renewing damaged or missing strut cushions (bump rubbers). **Damaged or missing strut cushions that are not replaced during strut and cartridge fitments can cause premature strut failure.** A strut cushion consists of a convoluted rubber boot or gaiter and a urethane compression bumper. These fit together and slide over the piston rod to rest on the strut's body.

The gaiter protects the strut's chrome piston rod from damage, keeps dirt out of the seal, pitting from stone chippings and corrosion from whatever the road may throw up.

The compression bumper, which fits into the boot, avoids internal damage being caused by preventing metal-to-metal contact under severe compression of the piston rod.

Notes

GASLIFTS & STEERING DAMPERS

The Gabriel® Gaslift® range is locally designed and developed to be a simple, hassle free, cost effective and customisable solution, that will allow you to take the lift out of lifting.

Used to open, hold open and close many various items; the Gabriel Gaslift® range is used on vehicle bonnets and boots, doors, canopies, trailers, sun beds, windows and many more applications.

Available in both an extensive automotive and industrial range, the Gabriel® Gaslift® solution is supported via a variety of high quality, long lasting end fittings that will best suit your application and lift angle. Also through our national gas filling solution, you can fill the differing units to the specific pressure that you will need to meet the required weight, angle and application.

Covered by the Gabriel warranty, the Gabriel Gaslift® range delivers up to Gabriel's historical South African pedigree and provides for total peace of mind when it comes to taking the lift out of lifting.

Product Range - Gaslifts

Gabriel® Gaslift®

Gabriel® Gaslift®

Takes the lift out of lifting.

The Gabriel® Gaslift® series is designed to be a hassle free and customisable solution to assist in many various applications from, bonnet and boot applications, opening, holding open and closing doors to canopies, sun beds and window solution.

The Gabriel® Gaslift® range is also available in extensive automotive and industrial applications.

The range is supported through a variety of connection end fittings. Further, there is a national gas filling solution to fill units to a specific pressure to meet the required weight, angle and solution.

All of the range is covered by the Gabriel warranty and delivers up to its historical South African pedigree and provides for total peace of mind.

Gabriel® Gaslift®

Gabriel® Gaslift®

Product Features

- Ø16 and Ø19 Bore working cylinder
- Designed to be used to a pressure of up to 1000N (rod size applicable)
- Uses specific oil infused with nitrogen which is designed to work in South African and African climates
- Single lip rod seals
- Sintered metal rod guides
- NBR rod seals
- Gabriel® 12 month warranty

Product Benefits

- A hassle-free ready to use solution for both industrial and automotive requirements
- The industrial range can be customised for particular applications
 - 4000 Series can be pressurised to 500N
 - 4100 Series can be pressurised to 1000N
- Plastic or metal end fittings to suit specific applications and cost options
- Universal canopy replacements
- Manufactured locally to the highest quality standards using premium quality components

Gas Filling Machine

The Gabriel gas filling machine offers you the convenience of pressurizing the Gabriel industrial Gaslift to the application force required. The gas filling machine may be purchased complete with regulators, hoses and fittings or these accessories may be bought separately.

Part No: I44273

Part No.	Product	Model	Derivative
I44273	Gabriel®	Gas Filling Machine	Gaslifts
I44283	Gabriel®	Hoses, Fittings & Trigger Valve	Gaslifts
I44284	Gabriel®	Harris High Pressure Regulator 987-170 Series	Gaslifts
I44285	Gabriel®	Harris Medium Pressure Regulator 987-100 Series	Gaslifts

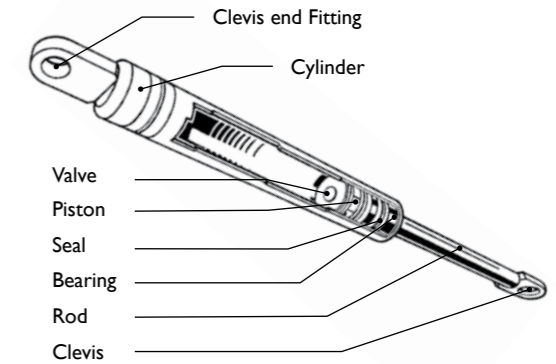

Gabriel®

E&OE

Product Range - Gaslifts

The Gaslift® spring consists of a cylinder, piston and rod assembly able to extend and contract telescopically. The cylinder is filled with nitrogen gas at a very high pressure. It is this gas pressure which creates the lifting ability of the Gaslift® and the force exerted is proportional to the gas pressure.

A measured quantity of oil inside the Gaslift® lubricates the piston assembly and provides damping at the end of the extension movement. The damping imparts a more gentle action to the object being moved. Therefore, the Gaslift® should always be mounted with the rod in a downward position, when the door is fully opened.

Calculating the force (FI)

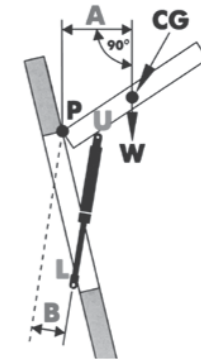

Required to hold the lid in the Open position
Refer to the diagram:

- FI** – Force exerted by Gaslift® in Fully Extended Condition
- U** – Upper Mounting Point
- L** – Lower Mounting Point
- P** – Pivot Point
- CG** – Centre of Gravity
- A** – Horizontal Distance from CG to Pivot Point P
- B** – Perpendicular Distance from axis U-L to Pivot Point P
- W** – Weight/Mass of lid

If the position of the **CG** of the lid is not known, then a spring balance or similar can be used to measure the force required to hold the door open. If the force is measured at the upper mounting point **U** this force plus 10 – 15% safety factor is the **FI** required. If the force is measured at any other point, use the perpendicular distance from the pivot point **P** to the attachment point of the spring balance as **A** and the spring balance reading as **W** in the formula.

Diagram of typical application

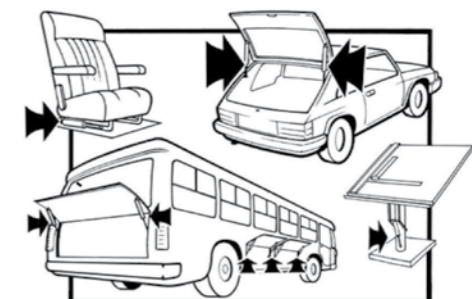

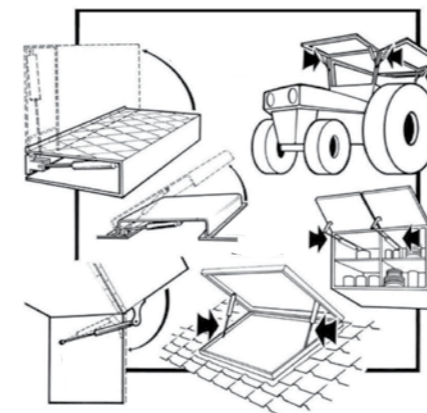

(*Refer formula to calculate)

Note:

By changing the Gaslift® axis **U - L** the lid can be made to open automatically once the catch is released, or stay closed so that no catch is required. The calculated force is only enough to balance the mass – add more to keep the flap firmly in place. Work to low side of the calculated pressure at first because additional gas can be added, but pressure cannot be reduced.

$$* FI = \frac{W \times A}{B} + 10 \text{ to } 15\% \text{ safety factor}$$

WARRANTY POLICY

Control Instruments Automotive Warranty on Gabriel Shock Absorbers

1. This warranty is expressed in lieu of all other warranties and representations express or implied.
2. Control Instruments Automotive Pty Ltd (CIA) warrants that all products supplied to its customers comply with the relevant industry quality standards.
3. CIA warrants its Gabriel® shock absorbers in accordance the following schedule, subject to the specific restrictions and or warranty limitations which are detailed below.
 - 3.1 Gabriel® shock absorbers used on passenger cars and light commercial vehicles (up to 1 000 kg load capacity), are warranted for a period of 36 (thirty six) months from date of purchase. This only applies in South Africa, Botswana, Namibia, Swaziland and Lesotho. Zimbabwe, Zambia, Malawi and Mozambique have a warranty as per 3.2 below on all vehicle types. All other countries terms and conditions are available on enquiry.
 - 3.2 Gabriel® shock absorbers used on all other types of vehicles are warranted for a period of 12 (twelve) months from date of sale to user, or 20 000 km, whichever occurs first.
 - 3.3 Gabriel® gas-springs (Gabriel Gaslift®), both industrial and automotive, are warranted for a period of 12 (twelve) months from date of sale to user.
4. The CIA warranty covers all manufacturing defects, but does not cover normal deterioration of a product through normal use. CIA warrants that the products manufactured and or distributed shall be free from defects in material and workmanship.
5. Any product, in respect of which a manufacturing defect has been found, may be returned to CIA within its warranty period in order for it to be repaired or replaced or to have the purchase price of the product repaid, at CIA's discretion. The replacement unit will be similarly warranted but only for the balance of the duration of the original warranty

Consumer Protection Act warranties

6. In terms of the Consumer Protection Act No. 68 of 2008 (CPA), in the event that a product supplied by CIA is unsuitable for its intended purpose, of poor quality, not in good working order; defective, sub-standard or wears out before the reasonable service life of the product and the product is returned to CIA within six months after delivery of the product to the buyer, CIA will:
 - a) Repair the product;
 - b) Replace the product; or
 - c) Refund the price of the product.
7. In terms of the CPA, if CIA is directed to repair the product and, within 3 months after that repair, that repair is ineffective or a further problem with the product is discovered, CIA will then replace the product or refund the price of the product.
8. CIA will have the right not to provide the remedies set out above to the extent that the CPA does not oblige CIA to do so in the circumstances of a particular case.

General Conditions, Restrictions & Limitations

9. The buyer of the product must make use of CIA's returns policy and claims procedure, available on its website www.ci-automotive.com, or the Gabriel website www.gabriel.co.za, or available directly from the company or any of its representatives. Except to the extent impermissible in terms of the CPA, no warranty claims will be approved by CIA unless these returns policy and claims procedures are followed.
10. Notwithstanding the returns policy but subject to the CPA, CIA reserves the right to at any stage reject the return of goods should it feel that the goods have been abused or that the goods have deteriorated through excessive use within the warranty period. CIA shall then have the option to return the rejected goods to the buyer.
11. CIA shall not be liable for damages resulting from delays in shipment or inability to ship due to normal production and shipment delays or those resulting from acts of God, fires, floods, wars, sabotage, accidents, labour disputes or shortages, plant shutdown or equipment failure, voluntary or involuntary compliances with any law, order, rule or regulation of governmental agency or authority; or inability to obtain material (including power and fuel), equipment or transportation, or arising from any other contingency, circumstances or event beyond the control of CIA.
12. All Gabriel products are fit for purpose for which they have been supplied. In the case of products listed in this catalogue, products should only be used in the vehicles described and under the operating conditions appropriate to these vehicles. The warranty does not extend to vehicles with lowered or modified suspensions and the warranty applies only to goods where the user can prove that such goods became defective in normal and proper use.
13. Except to the extent permissible in terms of the CPA, CIA will not be liable for any loss of profit or any consequential loss or damage, from whatever cause arising, including loss of any labour or fitment costs
14. The above warranty only applies within the warranty period, and when proof of purchase can be verified. A copy of the customer's original purchase invoice is required for all warranty claims. The customer's details should be provided with the claim.
15. Under no circumstances will warranty claims be entertained if the piston rod of the faulty unit has sustained any damage that appears to have been inflicted by tools.
16. The warranty will be void if bump rubbers are not used.

PROCESSING A WARRANTY

Requirements for processing a claim through the Gabriel Care-line

- When processing a claim through our Gabriel Care-line please have the following information with you:
 - Motorist's name and phone number
 - Claimed part number
 - Manufacturing Date code
 - Invoice date and number
 - Type of fault/Customer complaint relating to the various fault codes
- Call **0861 GABRIEL (0861 422 7435)** to register your warranty claim.
- Should the information supplied be correct, then an RMA number will be issued and this number should be used along with your own internal reference as the credit reference back to your product supplier. It is advisable that the RMA number is physically written on the product with a White/Black Paint Pen prior to returning it back to the supplier. Should this not be possible, you must indicate on the return paperwork the RMA number for the supplier to record on the unit accordingly.
- Should an RMA number not be issued, the reason will be explained to you for communication to your customer.
- As Gabriel honours national warranties from any store, irrespective of where the customer purchased the units from, it is still your responsibility to validate if the customer has a valid invoice and we advise that you make a copy of this invoice for your records.
- For further enquiries please feel free to contact our offices or your Gabriel Sales Representative
- See below for warranty fault codes required for your Gabriel® care-line call

No.	Name	Description
0	No fault found	There is nothing functionally wrong with the shocks
1	Fluid leak (Bottom)	Oil leak through bottom mounting/weld (very rare)
2	Fluid leak (Top)	Oil leak through top seal
3	Mounting bracket, spring seat or rod broken	Visual inspection to see if one of the three is broken
4	Mounting rubber/sleeve failure	Worn out rubbers or rubber mountings that have moved out of the mounting
5	Loose dust cover/cap	Only applies to metal dust covers that rattle if the weld is broken
6	No resistance	The rod will move up and down with no resistance
7	Low resistance/soft (check whether gas or non-gas)	It will take a little effort to compress
8	Seized/binding	Shaft will not move at all - in or out
9	Knocking noise (lag effect)	Can only be checked off the vehicle - takes experience to pick this up
10	High resistance	Will take a lot of effort to move but could be in spec
11	Gas loss	Rod will not extend on its own
12	Squeaking noise	Dry squeaking sound coming from the shock
13	Grunting noise	More or less same as squeak but deeper
14	Safety critical fault	Anything broken on a strut or spring seat unit only
