Atlas 300 CHO

Large LCD, Digitally controlled functions, Washable HEPA

Description:

Only the very latest technology inside the Atlas 300CHO Electronic Air Purifier: Ionic/Ozone Air Cleaner with Washable HEPA Filter and Remote Control.

This machine has been beautifully constructed with High Quality laminated wood cabinetry. This Atlas Air Purifier utilizes a 6 Stage Air Purification process and has a washable HEPA filter which can be washed and reused.

With the use of the remote control you can control the filter functions or the options. The air purifier is very compact yet powerful, It can provide up to 3500 SQ FT of clean air. Inside you will find 6 stages of air purification: Anion and UV Lights for organic contaminants, a photocatalytic filter as well as a medical grade HEPA filter to capture or decompose larger particles, and a negative ion generator with an output of 11.3 trillion ions per second for dust, allergen, and bacteria removal. Breath easy, live comfortably with an Atlas 300 CHO.

Specifications:

- Dimensions 12.44 x 8.86 x 12.13 inches
- 120 Volts Grounded cord
